

Christian radio programming is extremely important to me, my family and my community. The two stations that I predominantly listen to are commercial free. They provide me with information and inspiration for my daily living and lifestyle. Due to the Christian based programming, I am able to manage my daily stress and I am inspired to give life to biblical principles. My marriage, friendships, and professional relationships have benefited from my interaction with Christian radio.

I appreciate having the opportunity to listen to Christian radio. I like having a choice of whom/what I listen to on the radio. I am not in favor of a community advisory board determining the content of the programming on my Christian stations. I am also not in favor of requiring on site staff to always be present while the station is running programming from a satellite.

I value my right to free speech. I perceive this right for Christian radio is being threatened. Please do not remove my choice of radio stations.
